Md Nahidul Satil, PMP®

PhD Applicant (Fall 2027) | Cybersecurity Governance • Cyber Policy • National Cyber Resilience

Austin, Texas 78665 | (929) 471-8424 | mdsatilislam@gmail.com

RESEARCH PROFILE

Former Bangladesh Army officer and technology professional with 15+ years across defense operations, national-scale digital programs, enterprise systems, and cybersecurity. My research asks how middle-income South Asian states can build resilient national cyber defense while coordinating civilian critical-infrastructure protection, institutional governance, and military operational readiness, with Bangladesh as the primary case. I seek a PhD to develop an empirically grounded governance framework that bridges policy research and operational practice.

RESEARCH INTERESTS

Cybersecurity governance and policy: national cyber strategy, institutional coordination, cyber risk governance. **National cyber resilience:** critical infrastructure protection, cyber capability development. **Civil–military cyber governance:** defense–civilian integration, cyber operational readiness. **Cybersecurity in developing states:** South Asian cyber capacity, institutional development, international cooperation.

EDUCATION

Master of Science in Military Studies (Army Staff Course) 2015–2016

Defence Services Command and Staff College, Bangladesh University of Professionals | CGPA 3.59 / 4.00

Thesis: Integration of JCOs and NCOs as Facilitators with the Senior Command and Leadership for Promoting Participatory Leadership in Bangladesh Army

Coursework: National and International Security Studies, Strategy and Theories of Warfare, Defence Management, Joint Warfare, Operational Planning, Command and Leadership; dissertation and viva voce.

Bachelor of Arts 2002–2004

National University, Bangladesh

RESEARCH EXPERIENCE

Independent Research Project 2026–Present

Toward a Resilient Digital Battlefield: Detection Capability and Strategic Force Development in Middle-Income Countries within a South Asian Context

- Studies national cyber resilience and cybersecurity governance in middle-income South Asian states, using Bangladesh as the primary case.
- Assesses the preparedness of military and civilian institutions to respond to contemporary cyber threats, with attention to civil–military coordination, national cybersecurity policy, and institutional capability development.
- Combines primary survey data with secondary policy and literature analysis to evaluate cybersecurity readiness.
- Applies the NIST Cybersecurity Framework (CSF) 2.0 as a reference framework for assessing organizational cybersecurity posture.
- Develops strategic recommendations for strengthening national cyber resilience while supporting military operational readiness.

Graduate Researcher, Master of Science in Military Studies 2015–2016

Bangladesh University of Professionals

- Designed and conducted independent mixed-methods research on integrating Junior Commissioned Officers and NCOs as facilitators to senior military leadership, using surveys, interviews, focus group discussions, and document study.
- Analyzed command and information-flow structures and identified organizational “grey areas” affecting decision-making and participatory leadership.
- Developed recommendations for the selection, education, training, and progressive employment of JCOs/NCOs as facilitators at brigade, division, and Army levels.

PROFESSIONAL EXPERIENCE

Swallow Technology — Founder & Project Manager Feb 2026 – Present

TSADA v1, drone swarm system | Austin, TX

- Leading development of the TSADA v1 drone swarm system from the ground up, owning project scope, roadmap, and technical decision-making.
- Applying PMP-based planning, risk management, and requirements definition to structure a new system build from concept stage.

Cognizant Technology Solutions — Software Development Engineer in Test Mar 2021 – Jan 2026

TriZetto Provider Services, Healthcare | Austin, TX (Remote)

- Designed automated validation frameworks (C#, .NET, Selenium, Azure DevOps) for enterprise healthcare software, strengthening reliability and reproducible verification.
- Integrated application, API, and database validation across the lifecycle; used SQL reporting to turn execution data into quality metrics for technical decision-making.

TxDOT (via PRIMUS Global) — SDET Consultant, Part-Time Mar 2023 – Oct 2024

Austin, TX (Remote)

- Evaluated build-versus-buy options for internal testing platforms on feasibility, scalability, and cost to support executive decisions; architected the move from legacy manual workflows to a scalable automation platform and built quality and deployment dashboards.

Square Textile Group — Head of Technical & HR Mar 2019 – Jan 2020

Dhaka, Bangladesh

- Led ERP and HR data and workflow modernization, including automated reporting, standardized process documentation, and product traceability; improved operational accuracy by 25%.

Bangladesh Army — Technical Project & Logistics Officer Jun 2004 – Feb 2019

Dhaka, Bangladesh, and international deployment

- **United Nations Peacekeeping, Democratic Republic of the Congo:** coordinated cross-border logistics and operational reporting during a UN peacekeeping deployment, building expertise in risk management and mission-critical operations in a multinational setting.
- Supported the nationwide biometric voter-registration rollout, including biometric data collection, validation, deployment coordination, and protection of sensitive citizen data at national scale.
- Managed large-scale technical and logistics operations for defense infrastructure, national identity initiatives, and international peacekeeping missions under demanding operational constraints.

SKILLS

Research methods: mixed-methods design, survey design and analysis, interviews and focus groups, case-study method, policy and document analysis, feasibility and requirements analysis, root-cause analysis.
Cybersecurity: NIST CSF 2.0, threat modeling, vulnerability assessment, identity and access management, secure systems architecture, CI/CD pipeline security.
Technical: Python, SQL, Java, C#, JavaScript; test automation (Selenium, Playwright, Appium); AWS, Azure DevOps, Jenkins, Git, Jira.

CERTIFICATIONS

Project Management Professional (PMP®), PMI • CompTIA Security+ • AWS Certified Cloud Practitioner (CLF-C02) • Google Project Management Certificate • CISSP (ISC2 Candidate; exam targeted Q4 2026)
